

CW-SYS is a wireless system that connects to electric gate operators. Add wireless vehicle detection to any electric gate operator for free exit, whether residential or commercial. Not appropriate for ALL solar gates. Check technical specifications due to 25mA standby current draw from Integrator. Install sensor in the driveway, beside the driveway, or on a post adjacent to the drive.

WIRELESS DRIVEWAY SYSTEM. Components (included with system): (1) Sensor puck; (2) Integrator; (3) Auger screws; (4) Batteries & clips; and (5) Terminal block screwdriver.  
3 Year Warranty
