

### Gate Protection Device

- Ideal gate alignment device
- Prevents damage to latches & hinges
- Greatly reduces gate-slam noise
- Tough, durable polymer + rubber bumper
- Two side fixing legs for added strength

**IMPORTANT:** GateStop™ should not be used on swimming pool gates, as toddlers may use them as footholds. GateStop™ is the ideal gate alignment device for preventing hinge, latch and gate damage. It prolongs the life of your gate. There are three models to fit gates of different sizes and materials. Made from high-strength polymer materials, they're guaranteed against rust, distortion and staining. For gates higher than 1200mm (4 feet) two GateStops are recommended to guard against severe "concussion" or twisting damage.

### Available Colors

 Black
